## **Flagging operations planned Saturday on Beaver Street at Chaffee Road**

**Jacksonville** – As part of resurfacing improvements on Beaver Street (U.S. 90) between U.S. 301 North and Jones Road, motorists will see changes in the flow of traffic traveling on Beaver Street at Chaffee Road Saturday, April 29 from 8 a.m. to 5 p.m., weather and schedule permitting, to install low profile barrier wall.

The installation of the barrier wall is necessary for the contractor to complete drainage and utility work at the Beaver Street and Chaffee Road intersection.

Flaggers will be utilized on Beaver Street west of Chaffee Road to direct eastbound and westbound traffic.

The Florida Department of Transportation (FDOT) selected Hubbard Construction Company to begin the \$5.4 million project in August 2016. Completion of the project is estimated in late May.
