Northbound I-295 Lane Closures Nightly Dec. 5-7

JACKSONVILLE, Fla. – As part of the Florida Department of Transportation’s I-295 at Normandy Boulevard Operational Improvements and I-295 from Morse Avenue to U.S. 90 Resurfacing projects, overnight lane closures are scheduled nightly Tuesday, Dec. 5 through the morning of Friday, Dec. 8 for milling and resurfacing, weather and unforeseen circumstances permitting. Intermittent ramp closures are planned during these lane closures.

Single and double lane closures will be in place beginning at 8 p.m. until 6 a.m. the following morning. During intermittent ramp detours, motorists are encouraged to follow posted detour signs and use caution in the area during this time.

The projects include ramp widening and operational improvements at the I-295/Normandy Boulevard interchange and resurfacing of I-295 from Morse Avenue to Beaver Street. The speed limit has been reduced to 55 mph in the construction zone throughout the duration of the project.

Hubbard Construction Company was selected to complete these projects at a cost of \$33.9 million in summer 2024, weather and unforeseen circumstances permitting.

Stay informed about lane closures and roadwork in your area by following FDOT District 2 at [@MyFDOT_NEFL](https://twitter.com/MyFDOT_NEFL) on Twitter, at [MyFDOTNEFL](https://www.facebook.com/MyFDOTNEFL) on Facebook or by visiting nflroads.com.

The Florida Department of Transportation’s mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state’s environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida’s residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department’s mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities.
