Northbound I-95 Ramp to Airport Road, Westbound Max Leggett Parkway to see Nightly Detours Beginning Friday

JACKSONVILLE, Fla. – Motorists traveling northbound on I-95 seeking to access Airport Road will encounter nightly detours for permanent beam replacement at the overpass. Westbound Max Leggett Parkway drivers traveling to westbound Airport Road will also be impacted by the closures.

The previously scheduled work was rescheduled due to weather conditions.

The overpass was damaged by an over-height commercial vehicle on Aug. 27 and requires a beam replacement.

The northbound I-95 ramp to Airport Road will be detoured from 9 p.m. to 9 a.m. Friday, Oct. 18 and again, from 9 p.m. to 9 a.m. on Saturday, Oct. 19.

Nightly detours of the ramp will occur from 10 p.m. to 5 a.m. Sunday, Oct. 20 through Friday, Nov. 1.

Motorists will be detoured to Pecan Park Road and return to Airport Road via southbound I-95. Detour signage and law enforcement will be onsite throughout the duration of the repair.

Superior Construction was selected to perform the permanent beam replacement. The total cost of construction will be paid by the insured party responsible for the damage.

Drivers seeking real-time traffic alerts are encouraged to visit www.FL511.com or download the FL511 app prior to their journey.

The Florida Department of Transportation's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state's environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida's residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department's mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities.
