

# Intersection Safety Improvements

**Estimated Cost**  
**\$5.2 Million**

**Schedule**  
**Fall 2018**

## Get Involved—Comments Welcome

FDOT remains committed to working with all project stakeholders. No final decision will be made until we hear your comments. There are many ways to provide comments.

- Complete a Speaker Card and make an oral statement at the microphone during the comment period.
- Complete a comment form and drop it in the comment box tonight.
- Mail or email comments to Jeff Daugharty, at the address provided in this handout by February 9, 2015 to become part of the public hearing record.

## Access Management Public Hearing Notice

Financial Project ID: 432648-1

Welcome to the public hearing regarding proposed safety improvements to the intersection of Atlantic Boulevard (SR-10) and University Boulevard (SR-109), in Jacksonville, Duval County, Florida.

The proposed improvements will provide safer traffic operations through the intersection of Atlantic Boulevard and University Boulevard. The recommended improvements include:

- An additional left turn lane from WB Atlantic Boulevard to SB University Blvd. (currently single left turn).
- Adding a right turn lane from NB University Blvd. to EB Atlantic Blvd.
- Extending the length of the existing right turn lane from SB University Blvd. to WB Atlantic Blvd.
- Relocate existing Lawrence Place (city street) to provide a safer connection to University Blvd. (move it further north, away from University/Atlantic intersection).
- Replace/upgrade existing signals with new mast arms, and lighting improvements.

**OPTIONAL**—Close median open on Atlantic Boulevard to Atlantic University Circle.

Right of way will be required to accommodate widening for additional turn lanes.

As of January 8, 2015, project documents have been available for review at the Regency Square Branch Library, 9900 Regency Square Blvd., Jacksonville, FL 32225 and the FDOT Urban Office, 2198 Edison Avenue, Jacksonville, FL 32204.
