

PROPOSED MEDIAN MODIFICATIONS

ABOUT THE PROJECT

HSC Jacksonville West, LLC has applied for a permit to construct a Tractor Supply Company located opposite of Titania Street on eastbound Normandy Boulevard. The proposed plans would improve site access with a single driveway at the easterly edge of the property. The median is proposed to be modified to a directional median serving left turns into the proposed Tractor Supply property and onto Titania Street. The introduction of a directional median will create the need to divert southbound left turn movements from Titania Street. The introduction of a directional median will reduce delays exiting Titania Street and preserve capacity at Lamplighter Lane to accommodate vehicles wishing to travel east on Normandy Boulevard. The proposed reconstruction of the median opening will result in improved safety by reducing turning movement conflicts. Information about the proposed changes, including the traffic study and site development plan, are available for public review at www.nflroads.com.

With this notification, the Florida Department of Transportation is seeking input from property owners who may be impacted by the proposed changes. If you would like to comment on the proposed median modification, please send your comments to Maintenance Program Engineer Permits Manager Julian McKinley, P.E. at (904) 360-5458, via email at julian.mckinley@dot.state.fl.us or by mail at 2198 Edison Avenue, Jacksonville, Florida 32204. **Public comments will be accepted on the proposed modification through October 14, 2021.**
