

Hybrid Public Meeting

The Florida Department of Transportation (FDOT) District 2 invites you to the Hybrid Public meeting for the Richardson Road over South Prong St. Marys River Project Development & Environment (PD&E) Study. FDOT is conducting a PD&E Study to replace the Richardson Road bridge (No. 274114) over a tributary of the St. Marys River. The purpose of this meeting is to inform the public of the evaluated alternatives and provide an opportunity for the public to express their opinions and concerns regarding the project.

For your convenience, there are several options to participate in the public meeting including an in-person option and a virtual / online option. All participants, regardless of the platform they choose, will receive the same information on the proposed project, and all comments received in-person, virtually, or electronically, will be given equal weight.

For more information regarding the project please visit the project website at www.nflroads.com/richardsonroad

Richardson Road Bridge

About the Project

The existing Richardson Road bridge over South Prong St. Marys River is a single-lane, seven-span structure. The bridge is 87.5-ft long, 12-ft wide, and composed of concrete slabs supported by timber columns. Constructed in 1960, the bridge connects two unpaved segments of Richardson Road.

This PD&E study proposes to replace the existing bridge with a single-lane, cast-in-place concrete slab bridge supported by concrete columns. The proposed bridge will be built wide enough to be used as a two-lane bridge after the future widening of Richardson Road into a two-lane road.
