Hybrid Public Meeting

FDOT District Two

Main Street Bridge Replacement over Pimple Creek
Taylor County, Florida
Financial Management Number: 210870-2

Virtual Meeting March 4, 2025 at 5:30 pm to 6:00 pm | **Presentation & Public Comment Period** 6:00 pm
In-Person Meeting March 6, 2025 at 4:30 pm to 6:00 pm | **Presentation & Public Comment Period** 6:00 pm

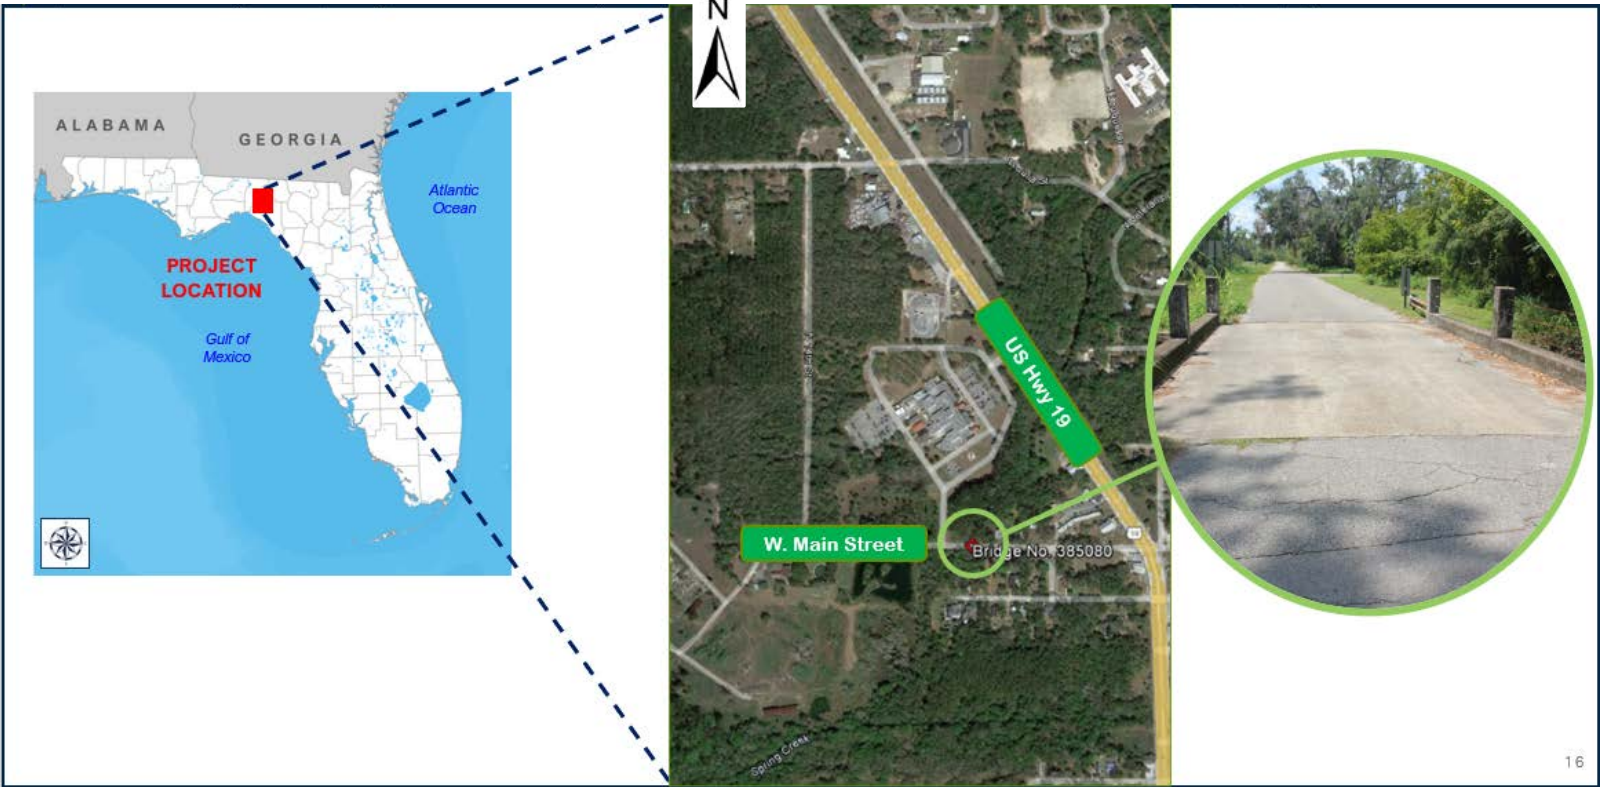

The Florida Department of Transportation (FDOT) District 2 welcomes you to the Hybrid Public meeting for the Main Street over Pimple Creek Bridge (#385080) Project Development & Environment (PD&E) Study in Taylor County, Florida. The PD&E Study is evaluating alternatives to replace the Main Street bridge over Pimple Creek.

Project Development Phases

The FDOT’s process for delivering a transportation project through construction consists of five phases. These include Planning, PD&E, Design, Right-of-Way, and Construction. Currently, the Main Street over Pimple Creek Bridge project is in the PD&E and Design phase.

Project Location Map

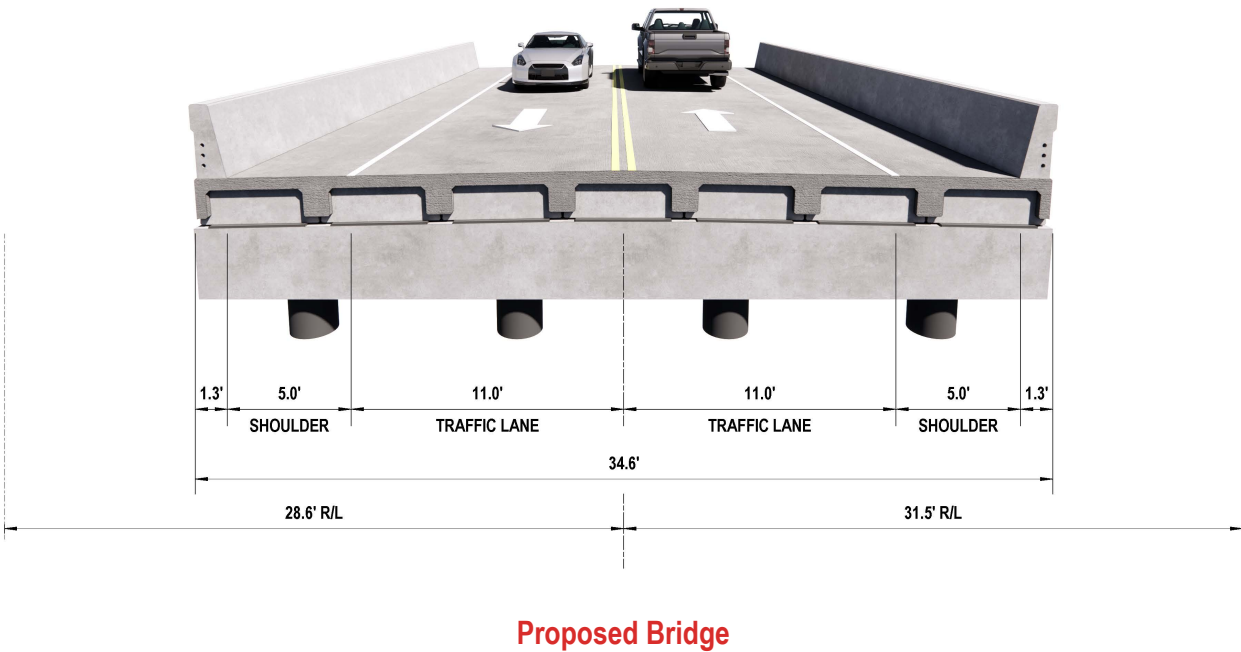

Right-of-Way

The Proposed Main Street bridge project will be constructed within City right of way. This project will not cause any relocation of families or businesses. All right of way acquisition will be conducted in accordance with Florida Statute section 339.09 and section 421.55 and also the Federal Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, commonly known as the Uniform Act.

About the Project

Constructed in 1950, the existing Main Street bridge over Pimple Creek is a two-lane bridge comprised of a prestressed concrete slab supported by timber piles.

As part of this PD&E Study, a Build Alternative was considered. The proposed Build alternative would provide a single span concrete bridge supported by concrete piles, with two 11-foot-wide travel lane, and 5-foot wide outside shoulders.

Detour Route - Length of Detour is 0.83 miles
